

Any legislation that lowers the protection from proceeding 02-278 shows how money and greed can plague our decision makers. I can just imagine the lobbyist for the Telemarketing organizations. I just wonder how much they are offering our legislators to try and overturn this proceeding. It's almost like the Opt-In Opt-Out program of companies. How the government allows them to automatically add you to their opt-in program so they sell our personal information to other companies. Like our banking account numbers, balances, social security numbers and the like. No wonder there is so much fraud going on in the world. The government is too busy getting rich from the kick-backs of companies that want to take advantage of us.
